

Annex 1: Logical Framework

The Intervention for the 4 years is defines in the following matrix – **Log frame:**

<p>O.E 1 Strengthen capacities for Climate Change adaptation, promotion of food security and income generation with value chain approach for 3,650 families affected by natural disasters in the provinces of Agusan del Sur, Surigao del Sur and Compostela Valley</p>	<p>IOV.OE.1.- At the end of the project, 75 local governments part of the Convenio have implemented at least 40% of the initiatives and actions foreseen in their LCCAPs</p>
	<p>IOV.OE.2.- At the end of the project, local authorities have increased by 20% the resources invested in projects to improve CCA and food security in the targeted communities</p>
	<p>IOV.OE.3.- At the end of the project, 1.825 women have benefited from public initiatives for disaster risk reduction and recovery</p>
	<p>IOV.OE.4.- At the end of the project, 80% of the targeted producers have increased by 20% their income and access to basic basket, and have diversified the production in their lots</p>
	<p>IOV.OE.5.-At the end of the project, 50% of the producers / beneficiaries have included short cycle crops in their lots and increased their savings by 20%.</p>
	<p>IOV.OE.6.- At the end of the project, the 3 organizations identified in the selected VC have established stable commercial linkages with an anchor company with mutually beneficial terms and conditions.</p>
	<p>IOV.OE.7.- At the end of the project, 915 women have accessed to productive inputs (seeds, credit and/or low-cost technologies) to improve their levels of income.</p>

<p>R.1. Strengthened 75 local governments for the implementation of Climate Adaptive actions and DRR strategies</p>	<p>IOVR1.- At the end of the project, 80% of the Local Governments participating in the Project have climate change adaptation plans that incorporate specific actions in the target communities;</p>
	<p>IOVR1.2.- 80% of the Local Governments participating in the project use climate information, including integration and interpretation of the climate scenarios, for the planning and implementation of DRR/CCA related interventions;</p>
	<p>IOVR1.3.- At the end of the project, 30% of local population, including women, men, children, and other vulnerable groups, participates in the contingency plan simulation and demonstrates enhanced preparedness during the simulations;</p>

	IOVR1.4.- At the end of the project, 80 % of the Local Governments have been assisted to develop proposals to access resources of the People Survival Funds or other Public Funds for Local Development for DRR or CCA initiatives.
	IOVR1.5.- At the end of the project, 3 Provincial Governments with structurally safe and dignified ECs with basic services that meets the specific needs of women, children, men, and other vulnerable groups during disasters/displacement
R.2.- Improved food security and production adapted to climate change for 3,650 families affected by natural disasters	IOVR2.1.- At the end of the project, 360 farmers participate in FAO Climate Field Schools.
	IOVR2.2.- At the end of the project, 915 of women accessed to additional income through the development of resilient alternative activities;
	IOVR2.3.- At the end of the project, 915 women and 915 men enrolled, have accessed to insurances, credits and/or financial services;
	IOVR 2.4.- At the end of the project, 3650 producers have increased up to 40% their productivity and reduce 50% their post-harvest lost through the good practices promoted with the project
R.3- Promoted economic opportunities for 250 low-income producers (50% women) through the development of inclusive business strategies and public-private alliances	IOVR 3.1.- At the end of the project, a low-cost technology has been identified and disseminated through the collaboration of the private sector, to improve the economic returns of the target population;
	IOVR 3.2.- At the end of the project 3 agro-associations/rural cooperatives have improved their operational and management system through CODESPAs FOSOE methodology;
	IOVR 3.3.- At the end of the project, at least 40% of the management positions of the target agro-associations/rural cooperatives are female
	IOVR 3.4.- At the end of the project there are at least 3 commercial agreements between the target group and companies that guarantee fair prices for producers.
	IOVR 3.5.- At the end of the project, at least 550 vulnerable producers/ fisherfolks have benefited from the engagement with the enhanced agro-associations/rural cooperatives
